Summary

As a cybersecurity professional, I have a passion for network and website hacking, penetration testing, which I apply to help organizations protect their data and assets from cyber threats. I am currently pursuing most valuable certificates by biggest tech companies (Google, IBM...), where I have learned the fundamentals of cryptography, network security, and ethical hacking.

I have also gained practical experience as an Import Department Intern at Polsan Button, a leading button manufacturer and exporter in Turkey. There, I performed penetration testing, SQL injection, and Linux administration tasks, and contributed to the improvement of the import process and documentation. I have earned the Google Cybersecurity Professional Certificate and the CompTIA Security+ certification, which demonstrate my proficiency and passion for the field. I am fluent in Turkish, English, Kurdish and Russian. I aspire to become a cybersecurity expert and a valuable asset for any organization.
